

Level 36: Changing Negative Universal/ Multi-Universal Beliefs

Our Beliefs are the base from which we apply the Universal Belief Systems (established throughout our years on Earth), which are the major detriments in creating every aspect of our lives. Our beliefs are also the filters through which we screen all that comes to us as well as all that we think, say, and do. Beliefs are the basics of our consciousness. If we are going to transform our consciousness, we need to change our beliefs.

The universal phenomenon of mortality and human's understanding of this phenomenon make it necessary for humans to have a belief system with respect to mortality. Possible beliefs range from – there is an afterlife to there is no afterlife. Early belief in an afterlife (you have to be dead) is verified by artifacts that would help an individual to believe in an afterlife (again, you have to die a physical death to have an afterlife). Artifacts are not available to support the concept of no afterlife beliefs. This phenomenon of human's innate desire for survival is to create a need for the invention of an afterlife and the belief in an afterlife. The almost universal belief in an afterlife, as indicated by the billions of people alive today that believe in an afterlife, is a compelling argument that humans have a need for a belief in an afterlife (that there is something more). Although you can think this universal belief away, it is only thinking and tucked further away in your subconscious. It is totally ingrained in our physical bodies. You can't remove this or change these universal beliefs through prayer, positive affirmations, zapping, writing them down and burning them, etc. Once we (Loren and Diane) alter/change these universal core beliefs (and a few other universal core beliefs) from you, then you can get to the rest of your this lifetime physical core beliefs which will be easier for you to address.

AS YOU BELIEVE, SO IT BECOMES FOR YOU

In Level 2, our work addressed Soul Beliefs (negative and limiting personal beliefs) along with Matrix Energy Patterns. This level only dealt with issues (beliefs) that were in your **auric** field. This level, however, is located deep within your physical body. Like your own fractal multi-universe.

Understanding ascension is a highly scientific process of multi-dimensional energy mechanics. The ascension process represents the pathway and order through which our human consciousness evolves through a multi-dimensional system, such as our Universe. In terms of the planetary ascension (Earth to New Earth), this process involves the transmutation of matter to move into progressively less dense states by evolving from the lower dimensional frequency bands of existence into higher dimensional frequency bands. Your core belief systems are dense and solid and difficult to alter. We (Loren and Diane) go in and change them from a solid state to a more

fluid or gaseous state depending on your personal vibrational rate thus making it easier to change your beliefs as you progress and change.

As human beings, we are involved precisely in this same process the Earth is, as the human is an intrinsic part of these energy fields of the planet and the progression of dimensional ascension for the human and the planet are intimately connected. The planet and humans all evolve through these levels of dimensional scale through the universal laws of energy which hold together the structures of consciousness that form identities in time. **Every** being in existence is involved in this evolutionary process and so the dynamics of the ascension applies directly and impacts **each and every one** of us. No one is excluded. Change is happening whether you like it or not.

We are starting to realize a bridging or merging between the energetic grids into higher frequency fields that will create another **Time cycle(s)** of our experience to be evaluated from the human perspective of reality. The higher frequency we are experiencing now is that the planet is gradually merging into is the fifth dimensional frequency infused in a future timeline of the Earth's cycle of evolution. The timeline for the Earth, at the existence of the fifth dimensional frequency, is a full reality experienced by humans at that future timeline in this simultaneous moment!

During this cycle the energetic grid of third dimensional Earth will fuse with the energetic grid of its double within the parallel universe its counterpart. This happens in a phase transition as the two planetary grids **merge into the New Earth**. The New Earth will emerge on the Earth similar to an etheric body structure, to align the Earth blueprint to that of the New Earth's. These mechanics of energy create fluctuation within the electromagnetic fields of both the New Earth and the Earth and will create a space time warp. **This time warp serves as a portal passage between Earth and the New Earth, which will open during a period of time in prior to and after 2012**. The portal stays open for about a five-year period of time and then progressively closes.

We are seeing some evidence that the portal is starting to open. The path through these portals are like a maze. It is not like a regular doorway. At this early time it is extremely easy to get lost, confused, disoriented and dangerous.

During the period of time when the portal is open, the imprint of the fifth DNA strand is to be made available to all of the races to have the opportunity for the ascension to New Earth. This is why now during this cycle of time we are experiencing many physical awakening symptoms as

our bodies and energy fields are being prepared to activate genetic codes and DNA to complete the ascension process to other timelines. These higher energetic frequency patterns activating into the Earth's grid are absorbed into our bodies and various patterns of illness, Karma, misaims and other imbalances surface. You have access to the tools needed to take care of these from **Level 35**. We on Earth are experiencing a myriad of possible symptoms and unusual events in our lives during this time as our consciousness is preparing for this reality. Individuals whose body, consciousness and energy field pulsate at the rate of the fifth dimensional frequency will experientially perceive either direct bodily transmutation through a Time portal passage from Earth to the New Earth. Naturally as humans we have choices and decisions to make in this process. It is extremely important for us to understand the impact of this decision upon our soul's evolution. This is a unique and rare opportunity for a quantum leap in the evolution of humanity as a species.

We have begun this process already, established formally by the guardian races and humanity at the harmonic convergence in August 1987. This planet and humanity have been in preparation for the end of this cycle, culminating the opening of the portal passages around 2012. As we are getting closer to 2012, it is important to be interactive in your own conscious evolution and to prepare for these new experiences by being balanced and integrated within your bodies. This will create the smoothest easiest transition for you and your psyche.

With this process it constitutes, in terms of the human perspective, the opening up of three tracks of time surrounding this cycle. During the period of time when the portal is open, **time cycle possibility one**: humans possessing the slowest vibration rates may find their consciousness fragmenting. However, guardian races plan an intervention to insure that humans would not experience the evolution digression again. (As has happened in the history of a few timelines of Earth that caused major cataclysms that shifted the consciousness to experience more separation, density and therefore pain and suffering, or control from the powers that be, i.e. fall of Atlantis, Genetic mutation creates slavery, etc.) **Time cycle possibility two**; humans with midrange vibration rates, which is presently the majority of the population, will generally find themselves in the present time, entering the Time cycle of the fourth dimension for a period of time. So you are given the time and opportunity to choose the higher reality of the fifth dimension through consciously choosing to do so. **Time cycle possibility three**; humans with the highest vibration rates will find themselves guided through portal passages.

The idea of shifting a planetary body from one timeline to another may seem quite outrageous especially to those who are not aware of the multi-dimensional reality perspective. This procedure is not used frequently as it is incredibly complex and delicate requiring intervention on many different levels of reality.

This is one of the reasons there is a huge alien interest in Earth's evolution and many reported alien experiences, abductions, visitations and other phenomena. Many other life forms including the guardian races make up a galactic, cosmic, and multi-universal intervention to ensure the success of this project. The planetary ascension cycles comprising of 26,556 years (Harmonic Time Cycle) to move up into the higher frequency realities has transpired quite a few times unsuccessfully.

We want to stress and repeat this information, to move up into the higher frequency realities we have to do our work on clearing out our stuff. We are too close to succeeding in this process. The following information explains what we and the Earth have gone through to get to this vibrational state. Your eyes might glaze over when you read it, but at least scan it, ok?

Each of the six 4,426 years smaller cycles within one a 26,556-year **Euiago Harmonic Time cycle** through which a planet evolves through the 3-dimensional bands of one Harmonic Universe.

One Time Continuum = 6 Time Vectors = 1.25 deg. Shift

Of the six *time continua* in a 26,556-year Euiago cycle, four time continua represent forward-moving tracks of time called **Pardo**, and two represent counter-rotating tracks of time called **Reiago**, in which the planet passes through the parallel universe.

A Planet progression through one **time continuum** creates a 45° shift in the angular rotation of particle spin (ARPS), or 1/8 of a full 360° rotation of particles, thus one continuum represents one **Octave**.

One Octave = a 4,426-year track of time.

One dimension contains 2 time continua, or two Octaves,

A planet progression through one dimension creates a 90° shift (2 shifts of 45°) in the ARPS, or one-fourth of a full 360° rotation, thus one dimension represents one **Harmonic Quadrant**.

One Quadrant = an 8,852-year track of time.

Three dimensions = 3 Quadrants = 6 Octaves (Time continua) = one Harmonic Universe.

One **Harmonic Universe** (HU) = a 26,556-year track of time = one **Euiago**.

The Planet exists within each of the six **time continua** simultaneously, through the synchronization of particle pulsation speed and angular rotation of spin (ARPS) within each of the **time continua**.

These processes give the consciousness perceiving the third dimension the *illusion of passage through linear time*. In actuality, time is not linear, but simultaneous.

Time Cycles of our planetary system have specific names, degrees of shift and number of years associated with them:

One Time Continuum = 6 Time Vectors = 1.25 deg. Shift

One Euiago = 6 Continuum = 7.5 deg. Shift

One Eyugha = 6 Euiago = 45 deg. Shift

4 Eyugha = 24 Euiago = 4 45 deg. Shifts

4 Eyugha of PCM = one 12 cycle = PCM Eyardo = 180 deg. Shift

4 Eyugha of PKA = one 12 cycle = PKA Eyado = 180 deg. Shift

One Eyana Cycle = one PCM Eyardo plus one PKA Eyado = 360 deg. shift.

- The way **time** is structured, *layered out like space*, means there are probabilities, different *time vectors* of the same set of events that can happen in different ways.
- The way that is the fulfilment of you and your Christ Self (love vibration) of fulfilling your **Heroic Potential**, your Divine Blueprint is called the **Heroic Path**. By using your many free will choices your goal is to reach the Christ Consciousness (vibration of love) or you could end up somewhere else.
- A 26,556 year **Harmonic Time Cycle**, through which a planet and humans evolve progressing through the 3-dimensional bands of one Harmonic Universe.
- Of the six time continua (4,425 years) in a 26,556-year Euiago cycle, four time continua represent forward-moving tracks of time called **Pardo**, and two represent counter-rotating tracks of time called **Reiago**, in which the planet pass through the parallel universe.
- One **Harmonic Universe** = a 26,556-year track of time = one **Euiago**.
- When passing from one Euiago cycle to the next the angular rotation of particle spin shifts 45°.

In summary what does all this mean? It means it has been a frigging long time to get to this opening (vibrational possibility), and we (Loren and Diane) certainly do not want to do it all again!!!!

It has been described that alien territorial disputes (who are no longer active) and certain violations to humanity to manipulate and harvest human energy was involved in its failure. This

was the reason our guardians from the higher dimensions are joined together to assist in bridging this project. Generally planets and civilizations are allowed to evolve along the course of their own natural progression following their own choices and meeting with the consequences of those choices. Occasionally a planet and its people get into consequences that are far-reaching and affect other neighboring planetary systems and in these cases intervention is permitted. Earth has been in such a state of crisis unknown to most of its inhabitants.

So to simplify the meaning of the bridging or merging project, it can be viewed as three probable future paths of development available to the human population. Approximately 2012 and within a five-year (more or less) transition period of time, there will be three distinct time choices into which the human consciousness can continue its evolutionary journey. Different portions of humanity will follow three different tracks of time. We will choose which path is open to us by our vibrational rate.

It has been our job (Loren and Diane) to coordinate and facilitate getting this information together the best way possible and to find its language. We hope to plant the seed that is the catalyst of awakening to the sleeping humans to take control of their own destiny by conscious choice of evolution by gaining their God given right to self sovereignty. By understanding the opportunity this presents is to choose a higher expression of their own experience in their chosen reality and that it is to be one of unlimited potential and creativity.

Benefits of this level include;

- Getting rid of negative universal core beliefs.
- Raising your vibrational rate.
- Being able to get rid of the core beliefs that you have been working on successfully.
- Gaining unlimited access to the New Earth.

Once you have altered or transformed your universal core beliefs, you can rewrite the personal core beliefs that you might be having trouble with.

Many people have e-mailed and called us dealing with their core, universal and multi-universal belief systems. What we tell people is to pay attention to how you react to situations that are being presented to you. What emotion is being triggered? Also your subconscious mind is

sending out signals to the universe as to what issues you need to deal with. You need to consciously be aware that these issues are being sent to you for a reason and they will continue to come at you until you have learned and dealt with the issue(s). Step One: Find the message the experience has for you. Step Two: Find the feeling. Step Three: Bring love to it. You can figure out what your core belief are in your life and applying the power of love to it, for “love transforms.”

So are you ready? Cost: \$900, although this seems like a lot, it will take us a minimum of at least 5 nights..... and about 4-5 hours per night..... the most labor intense level so far.
