

Chapter Four: Connecting vertically, horizontally, spherically

It is always interesting what catches your eye that causes you to go on a quest for answers. The statement this time was from a blog written by Kauilapele,

“Only the heart, opening wide – vertical, horizontal, spherical – can distill the transformed atmosphere within which his nature can shift from polarization into oneness, flowing through this very human drama in a way that is good for all concerned.” Along with the statement, *“The key to individual and planetary liberation is to connect vertically and horizontally.”*

In my mind, I know how to connect vertically. I would call this grounding and connecting to God or Source. What is meant by connecting horizontally or spherically? The other major question I had was, when or what caused us to shift out of oneness? I really want to live in a world without polarity. Doesn't that sound great?

So the question is where to begin? We believe that we were whole and complete when we were originally created by Source. Something happened along the way that started to breakdown our original stream of consciousness and we started to enter a realm of dimensionalized structures or our consciousness began to fragment through the dimensional scale producing lower forms of individuation or personal vibration. Each dimensional level goes down in vibration. The process can be viewed as a singular beam of light and sound, refracting into multiple beams. Each beam of light and sound consciousness that is formed through the splitting of the original consciousness retains part of the original design but has a lower vibration. The various structures of multi-dimensional human consciousness exists as forms of sentient awareness, identities possessing attributes and form, characteristic of the dimensions on which they appear.

So here we are in this lifetime, incarnate in a lower vibrational body in the third dimension. What is different about this current lifetime is that it is shifting from carbon based biology to a crystalline based biology. Each dimension has many levels that we have gone through to increase our vibrational rate to precede to the next level of awareness. It is through the multidimensional relationships between angles of particle and anti-particle spin that multiple reality fields can take place in the same space, while remaining invisible to each other. As a

planet evolves through this process, the rate of particle pulsation and thus the speed at which it moves progressively increases, while the density of matter progressively decreases. This actually is the process of evolution through the dimensional scale.

There are many many Time Matrices within the energy matrix, which are collectively referred to as The Time Matrix. All time matrices within the cosmic energy matrix follow a specific mathematical-geometrical program through which space-time and matter can be experienced by consciousness upon the time matrix structure. Time matrices are arranged upon a pattern of 15 different, but interwoven dimensions or Partiki Phasing rhythms (rhythms of expansion and contraction of energy). Each of the 15 rhythms of Partiki Phasing creates one Dimension.

Within the time matrix the 15-dimensions are further arranged into sets of 3 Dimensions, forming 5 3-dimensional reality fields called a Harmonic Universe, and each harmonic universe represents a level of matter densification specific to its intrinsic rates of Partiki Phasing. All dimensions exist at the same time but we at this point in time do not have the ability to shift from one dimension to the next very easily.

There are 5 simultaneous manifesting Euiago Cycles (Time Cycle) in every time matrix, through which consciousness passes in order to experience linear evolution through space, time and matter.

The first three dimensions (1, 2 &3) of the Harmonic Universe or Density Level are made up of gross physical matter, which is carbon based biology known as the Incarnate Self. We have spent countless lifetimes attempting to break out of this cycle and many will break free this lifetime.

The second group of three dimensions (4, 5&6) of the Harmonic Universe or Density Level is made up of physical matter, which is carbon-silica based biology known as the Soul Self.

The third group of three dimensions (7, 8 &9) of the Harmonic Universe or Density Level is made up of etheric matter, which is silica based biology known as the Oversoul Self.

The fourth group of three dimensions (10, 11 & 12) of the Harmonic Universe or Density level is made up of pre-matter, which hydro-plasmic liquid light known as Avatar or Christos Self.

The fifth group of three dimensions (13, 14 & 15) of the Harmonic Universe or Density Level is made up of Ante-Matter, which is thermo-plasmic light known as the Higher Self.

Remember, all the dimensions exist here and now. We do not have access to all of them because of our density level. Sometimes we get flashes of things that exist in other dimensions but can't hold our focus on what we just saw and it disappears because we exist in a lower vibration.

Now to address this idea of connecting horizontally. Our Earth is also in the process of shifting and changing right along with us. The Earth has a system of geographic Ley Lines. Ley lines

form a grid-like pattern all over the planet. The core energy system of our planet, along with the inherent portals, vortices, Ley lines and Star Gates are known as the Planetary Templar Complex. This includes the natural Thermo-radionic, Photo-sonic and Electromagnetic functions of the planet's organic system. The mathematical and geometrical structure of the universal, planetary and personal templar complex includes grids, shields seals, etc., as well as many other energetic structures. The organic energy system of a planet includes the realities of the interdimensional Time Portal and Dimensional Lock Systems, the natural network of Portals and Star Gates through which a planet is connected to many other interstellar, interdimensional, space-time systems. The ancient advanced Sacred Science knowledge concerning the manual operation of the powers of Earth's Templar has been lost to humanity for many thousands of years. The return of this knowledge in our contemporary times will enable human beings of the present generation and those yet to come, to orchestrate advanced applications of Global Healing, organic free energy systems and to eventually open access to the Star Gates and Portals of Earth's Templar Universal Life Force Currents from the dimensional spectrum continually circulate throughout the Planetary Templar Complex system, holding the planet in manifest matter form. We receive Universal Energy or Life Force Current through Earth's Templar via the organic energy conduits or grids of the natural planetary fields.

Last month there was a major energy shift for us. It started around the eighth of August (8/8). There must have been some form of portal or star gate that opened for we certainly felt and are still feeling these energies scouring every cell of our being, a vibration that we think will reverberate throughout the heavens for months to come.

The grid system that we, in physical form, plug into is a grouping by like polarizations that form strands or patterns of light-sound built upon specific electro-tonal units of sound frequency that are imbued with multi-dimensional electrical current. These strands geometrically group to form grids. These grids serve as templates for all consciousness and forms of matter. The cosmos represent a massive particle grid that serves as the Unified Field of primary substance within which All That Is exists and is connected. All beings and matter forms have personal grids which are formed within the grids of the Unified Field. You can imagine them as a carpet of light and sound invisible to our perceptions that exist beneath all matter forms and conscious identities.

Each human and object in our system has a particle grid composed of particle units and also a similar grid in our parallel universe which is the grid of our personal double. Since our multi-dimensional universe is composed of particle units, it moves twice as fast, it has more consciousness in their bodies because they move faster. If we learn to move our consciousness as fast, we can integrate and expand and that is the process of evolution.

So particle units group together by like polarization, electrical energy, and magnetic force that form strings of energy units. The particle strands group with other such strands forming geometrical grids of electro-tonal, electromagnetic energy that serve as a template of light

spectra and sound tones upon which particles and anti-particle structures form a fabric like grid. This fabric like grid is part of which makes up the Unified Field of living energy substance through which all things in the cosmos are energetically connected. **When we connect horizontally, we connect to the Unified Field of living energy substance.**

This chapter is where we assist you in creating a vehicle that will assist your body in its current state of density to shift into your multi-dimensional universe to speed up your physical consciousness so you can integrate and expand more rapidly and with less stress on your physical body.

Do you see how important this is? Do you understand why this is necessary/important to connect both vertically and horizontally? We are seemingly locked with our (almost) crystalline bodies in the 3rd dimension until we learn how to connect horizontally freeing us to be truly multi-dimensional. It is like looking at a single tree in our third dimensional world and you have an inner knowing that there is a forest that exists but you don't have the ability because of your current vibrational rate. Once you have your new vehicle or mode of inter-dimensional travel you will have a whole new world open up to you.

We have a friend that has been shopping around for a new car and can't seem to find one that is right. This search has been going on for the last year. This is how we came up with the idea of a new multi-dimensional vehicle for travel. We also have been working on bringing this chapter of work through for about the same period of time. Isn't life synchronistic?

The cost of this chapter is \$700.00.

What this work will do for you: This chapter of work is coming in at a most opportune time which will assist us in preparation for the end of 2012 and the energetic changes that are being talked about. We certainly want to be prepared for whatever lies ahead. This work will assist you in breaking free from the third dimensional realm into the higher dimensions. What a ride!!!
